

ABSTRACT OF THE DISCLOSURE

Drops of Honey is a capsule that is filled with honey. This capsule filled with honey is a food product in which the capsule dissolves in boiling water. This allows for the honey to escape into the beverage of choice, preferably tea. It is a food product that will be mainly used with tea and other hot beverages. A method of the product is to sweeten tea. Another method for Drops of Honey is to be used as a dietary supplement. The objective of Drops of Honey is to make it more convenient for the consumer to consume honey within tea or other hot beverages.
